

Shudy Camps Tree Warden Report May 2021

There has been lots of tree works going on in the parish, a lot of the tree and hedgerow removal has been done to improve the efficiency of the drainage ditches. Unfortunately a lot of this has not been done very sympathetically to the trees and hedges involved.

Quite a lot of tree removal happened from surrounding woodland but it does look pretty devastating just after but this should regenerate or is being replanted as this is commercial timber production and should look better in a reasonably quickly.

We have been given three trees which have been planted on the road heading to Mill Green by the bench. The parish council know more about these.
